ships	Tendency to cerebral spasmophilia	Central Nervous System, mind (controls psycho-vegetative state), weather sensitivity, weather-induced hemicrania, vegetative dystonia, cerebral spasms, central & peripheral detunctionalization phenomena, epilepsy, sensory & motor disorders (MS), brain/spinal tumor, vitality disorders, aphonia after extended talking, sciatica, migraine, headache, tinnitus, periarthritis humeroscapularis, nocturnal brachialgia — generally: upper extremities, hand eczema, skin problem, lace, hand edema, trigeminus neuralgia, neuritis.	Mammary gland, periarthritis humeroscapularis, urinary bladder ailments, typical signs: backside of shoulder pain, rheumatic affects of humero-ulnar joint, often radiates to ear, servo-steering of osmosis, dialysis, turbulence & thermal, waking sleep state, communication.	Mammary gland, kidneys & kidney stones, cerebellar irritation, nystagmus, hepatogenic cephalgia, suspension crystallization of body fluids, excretion of urates, phosphates, oxalates & citrates, rheumatism, hypothalamus. Larynx, vocal cords, partnership.	Controls gall meridian, liver-gall dystinesia, varices, chologogenic migraine, pyloric & duodenal stenosis, dyschoia, vein dilatation, arterial constriction of all organs, relationship to rhythmicity, dynamics, motility & peristalsis in small & large intestine, ventilation switch in Valer's diverticulitis. Ascending colon (upper part), transverse colon, family problems.	Eye diseases, ablatio retinae, agrypnia, vegetative dystonia, schizophrenic aspects, dysthyreosis, ocular fundus diseases, mental varieties, cell respiration, fermentation, enzymatics, liver-stomach-pancreas, dyspepsia & dysbiosis. All 4ths have a key position similar to the 8th. Ascending colon (upper part), transverse colon	Eye diseases, prothrombin steering, angina pectoris, cardial edema, stenocardia, blood metabolism, blood density, flow rate, stagnation, thrombosis & infarction, dyscrasic states, lack of concentration, anger depression, moodiness, fear sadness, instability, kidney functions.	Lymphatic "blood regulators", hematopoesis, prothrombin, hemophilia, ductus thoracicus, connection: intestinal circulation, vascular tonus, lymph tracts, sexual organs, lymph & white blood count, lymphatic build-up & defensive mechanisms.	conceptual connections, mental dynamics, vitality, hormonal capacity, emotional disturbances, impotence, sterility, creative genetic world, fear, sadness, instability, kidney functions, anger depression, moodiness.	conceptual connections, mental dynamics, vitality, hormonal capacity, emotional disturbances, impotence, sterility, hormonal balance, mental behavior, creative genetic world, fear sadness, instability, kidney functions, anger depression, moodiness.	Lymphatic "blood regulators", hematopoesis, prothrombin, hemophilia, ductus thoracicus, connection: intestinal circulation, vascular tonus, lymph tracts, sexual organs, lymph & white blood count, lymphatic build-up & defensive mechanisms.	Eye diseases, prothrombin steering, infarction donor, stenocardia, dyscrasic states, lack of concentration, stagnation, thrombosis & infarction, anger depression, moodiness, fear, sadness, instability, kidney problems.	Eye diseases, ablatio retinae, agrypnia, vegetative dystonia, schizophrenic aspects, dysthyreosis, ocular fundus diseases, mental varieties, cell respiration, fermentation, enzymatics, liver-stomach-pancreas, dyspepsia & dysbiosis, maxillary sinus. All 4ths have a key position similar to the 8th. Descending colon (upper part), transverse colon, family problems	Liver-gall dystinesia, varices, regulates the gall meridian, chologogenic migraine, pyloric & duodenal stenosis, dyschoia, vein dilatation, arterial constriction of all organs, relationship to rhythmicity, dynamics, motility & peristalsis in small & large intestine, ventilation switch in Valer's diverticulitis. Descending colon (upper part), transverse colon, family problems	Kidneys & kidney stones, cerebellar irritation, nystagmus, hepatogenic cephalgia, suspension crystallization of body fluids, excretion of urates, phosphates, oxalates & citrates, rheumatism, hypothalamus, mammary gland. Limbic region (Caution if large amalgam fillings) Larynx, vocal cords Emotional partnership	Mammary gland, periarthritis humeroscapularis, urinary bladder ailments, typical signs: backside of shoulder pain, rheumatic affects of humero-ulnar joint, servo-steering of osmosis, dialysis, turbulence & thermal, waking sleep state, pineal, often radiates to ear. Limbic region (Caution if large amalgam fillings), communication.	CNS, mind (controls psycho-vegetative state), weather sensitivity, weather-induced hemicrania, nervous breakdowns, vegetative dystonia, cerebral spasms, central & peripheral detunctionalization phenomena, epilepsy, sensory & motor disorders, brain/spinal tumor, vitality disorders, vegetative dystonia (impacted 8th?), aphonia after extended talking, sciatica, migraine, headache, tinnitus, (lack of space, septic noxa), xyasthenia in the legs (MS?), periarthritis humeroscapularis, nocturnal brachialgia. Generally: upper extremities, hyperkeratinous hand eczema, facial skin disease, hand edema, trigeminus neuralgia, neuritis.	Tendency to cerebral spasmophilia	Other relationships

onships	Meniere's, migraine, sciatica, shoulder arm syndrome tetanus arterial spasms caudal spastic neuralgic conditions between L 5 & S1 sciatica	Energy metabolism, peripheral nerves, upper & lower extremities neuralgia, periarterial spasms in the shoulder w/ circulatory spreading, rheumatic spreading in rear leg, neuralgiform pains in arms & legs, headache, migraine, vasospasms, central & peripheral disturbed function, epilepsy, sensory & motor disorders, brain & spinal cord tumors, vitality disorders, cervical spine syndromes, vegetative dystonia (impacted 8th?), sciatic gall disorders, myasthenia in the legs, dermopathic facial eczema, tonsillitis, urticaria, subfebrile temp., hypogastric pains, eye disease, vertigo, Meniere's, nocturnal brachialgia, disorders in the legs, severe dysfarment in the ileum region. Blood pressure	Radiates from ear, lumbago, radiation in appendages, bladder, pelvis & groin, pain inner knee, deep lumbago, sacroiliac syndromes, servo-steering of osmosis, dialysis, turbulence & thermal, sleep & waking state, pineal & arteries. Ascending colon	Radiates from ear, myalgia in the legs, masked on front side along stomach meridian, sacroiliac joint, deep lumbago, suspension crystallization of body fluids, excretion of urates, phosphates, oxalates & citrates, stone formation, rheumatism, hypothalamus, pituitary & veins.	Chologenic lateral arthritis from hip joint to knee, especially at insertion of cruciate ligament, hips, inguinal hernias, knee, foot joints, relationship to rhythmicity, dynamics, motility & peristalsis in small & large intestine, ventilation switch in Valer's diverticulitis, mammary glands, lymph vessels, communication.	(Spleen), pancreas, meteorism, vein marks on skin, connective tissue diseases, cell respiration, fermentation, enzymatics, liver-stomach-pancreas, dyspepsia & dysbiosis, mammary glands. All 4ths have a key position similar to the 8th.	Thromboses (leg lungs), varicose disorders, pancreas, esophagus, weak peripheral vessels, lungs, connective-tissue diseases, blood metabolism & blood density, flow rate, stagnation, thrombosis & infarction.	"mesenchyme", abdominal connective tissue (latent), appendages, testes epididymis, connective-tissue diseases, lymph and white cell count, lymphatic build-up & defensive mechanisms.	Urogenital tract, myomatoses, erosions, prostate adenoma, prostatitis (all connective-tissue diseases of bladder, uterus & prostate). Hormone metabolism, mental behavior, creative genetic world.	Urogenital tract, myomatoses, erosions, prostate adenoma, prostatitis (all connective-tissue diseases of bladder, uterus & prostate). Hormone metabolism, mental behavior, creative genetic world.	"mesenchyme", abdominal connective tissue: alarming (unlike 42 right), appendages, testes epididymis, connective-tissue diseases, lymph and white cell count, lymphatic build-up & defensive mechanisms.	Thromboses (leg lungs), varicose disorders, pancreas, esophagus, weak peripheral vessels, lungs, connective-tissue diseases, blood metabolism & blood density, flow rate, stagnation, thrombosis & infarction.	Spleen, (pancreas), meteorism, vein marks on skin, connective tissue diseases, cell respiration, fermentation, enzymatics, liver-stomach-pancreas, dyspepsia & dysbiosis, mammary glands. All 4ths have a key position similar to the 8th, communication.	Chologenic lateral arthritis from hip joint to knee, especially at insertion of crucialate ligament, hips, inguinal hernias, knee, foot joints, relationship to rhythmicity, dynamics, motility & peristalsis in small & large intestine, ventilation switch in Valer's diverticulitis, mammary glands, lymph vessels.	Radiates from ear, myalgia in the legs, masked on front side along stomach meridian, sacroiliac joint, lumbago, coccygodynia, deep lumbago, sacroiliac syndromes, suspension crystallization of body fluids, excretion of urates, phosphates, oxalates & citrates, stone formation, rheumatism, hypothalamus & veins, sigmoid rectum, anus (polyps, diverticulitis, hemorrhoids)	Radiates from ear, lumbago, radiation in appendages, bladder, pelvis & groin, pain inner knee, deep lumbago, sacroiliac syndromes, servo-steering of osmosis, dialysis, turbulence & thermal, sleep & waking state, arteries. Descending colon, upper portion of pelvic colon.	Energy metabolism, peripheral nerves, upper & lower extremities neuralgia, periarterial spasms in the shoulder w/ circulatory spreading, rheumatic spreading in rear leg, headache, migraine, vasospasms, central & peripheral disturbed function, epilepsy, sensory & motor vitality disorders, cervical spine syndromes, vegetative dystonia (impacted 8th?), sciatica, baldness, liver diseases with pain, gall disorders, myasthenia in the legs, dermopathic facial eczema, tonsillitis (8 5th has pocket), urticaria, subfebrile temperatures, hypogastric pains, vertigo, Meniere's, nocturnal brachialgia, eczema (especially lower), motor disorders in the legs, ileum: see 48 Blood pressure	Meniere's, migraine, sciatica, shoulder arm syndrome tetanus arterial spasms caudal spastic neuralgic conditions between L 5 & S1 sciatica	Other relationships
