

# *The Swine Flu Conspiracy: A Plan to Commit Mass Murder*

*The Underground Health Reporter™*

"A chilling tale of conspiracy to commit mass murder by those who are responsible for protecting human lives.  
***The Swine Flu Conspiracy: A Plan to Commit Mass Murder***  
-- coming to a town near you."

**T**he above reads like a suspenseful trailer for a blockbuster Hollywood movie like "*The Manchurian Candidate*" or "*Enemy of the State*."

But it's not a movie at all.

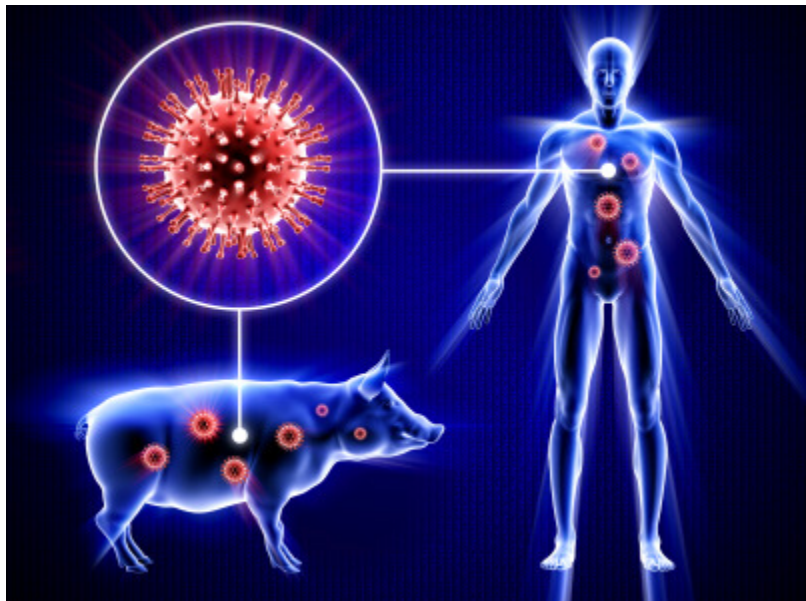

It's a TRUE STORY that's happening right now.

The World Health Organization, which has been predicting a massive **swine flu pandemic** that will infect one-third of the entire world's population, has every reason to be 100% certain of its prediction. It's because...

...the swine flu virus is about to be **deliberately unleashed** upon the unsuspecting public.

If you find this hard to believe, here's proof:

A medical journalist named Jane Burgermeister has recently filed criminal charges with the FBI against the **World Health Organization** (WHO), the **United Nations** (UN),

and several of the **highest ranking government and corporate officials** concerning their attempts to commit mass murder via the swine flu. [Source: NaturalNews]

This comes in the wake of charges filed last April against US-based pharmaceutical company, Baxter AG, and Avir Green Hills Biotechnology. Baxter was recently connected to the disturbing **scandal** involving flu vaccines. Several sources, including the *Times of India*, reported that last December, **Baxter inserted deadly live avian flu viruses into vaccines** that were distributed to 18 countries around the world to be injected into patients as "flu shots" -- allegedly as a **deliberate act to trigger a pandemic** and profit from the sale of vaccines.

However, a batch of the tainted vaccines was first tested on ferrets in the Czech Republic before being shipped out for injection into humans. Every one of the ferrets **died** -- and the SHOCKING discovery was made.

Since the contamination of the vaccination couldn't be blamed on an "honest mistake," newspapers immediately questioned whether the events were part of a conspiracy to deliberately **provoke a pandemic**, following up on accusations already made by health officials in other countries.

Jane Burgermeister contends that the WHO, the UN and high-ranking corporate government officials conspired with each other (and others) in a covert international program involving the pharmaceutical companies Baxter and Novartis.

The conspiracy entailed the bioengineering and then releasing of lethal biological agents -- specifically the "bird flu" virus and the "swine flu virus" in order to **accelerate the pandemic** by making the virus ever more *virulent* (with the addition of the Avian flu). This would then make an otherwise mild swine flu outbreak disastrous enough to **justify forced mass vaccinations**.

Such a forced mass vaccination program would rake in **billions of dollars in vaccine revenues** -- while the hoards of people who are vaccinated run the risk of suffering serious injury or even death in massive numbers!

## Can you REALLY be forced to take the swine flu vaccine?

Most people have never heard of the **international health regulations** and the **national pandemic plans** that ALLOW mandatory flu vaccinations. Most people think that no one can be FORCED to take the swine flu vaccine. **Wrong!**

Did you know ... that in the event of a Pandemic Level 6 emergency declaration, you would be required to follow the orders of the World Health Organization? In such an emergency, the WHO has the authority to force anyone (and that includes you) to be vaccinated and also to be quarantined.

Under such circumstances, it would be a CRIMINAL OFFENSE if you refuse to be vaccinated.

## So what's the worst thing that could happen if you were to be vaccinated?

For starters, if the vaccine you receive happens to be laced with live avian flu viruses, which Baxter has demonstrated itself capable of doing without being *penalized* -- the vaccine would be virulent enough to **kill** you.

This is the basis for Burgermeister's charges against the WHO and UN for conspiracy to commit mass

murder.

Furthermore, if the swine flu vaccine doesn't kill you, you may have an increased **CANCER RISK**.

According to German lung specialist Wolfgang Wodarg (who is also the chairman of the health committee in the German parliament and European Council), the swine flu vaccine's nutrient solution contains **CANCEROUS** cells from animals. It therefore stands to reason that **injection of the vaccine might also cause cancer** in humans.

The swine flu vaccine contains **shockingly** higher concentrations of squalene than was used in the anthrax vaccines, which caused hundreds of thousands of troops to suffer the catastrophic effects of Gulf War Syndrome.

Furthermore, the swine flu vaccine, which is being rushed to market without the appropriate testing and evaluation, may cause a repeat of the swine flu vaccine catastrophe of 1976, in which people died or developed crippling Guillain-Barré Syndrome or paralysis as a result of the experimental vaccine.

## **In the event that forced vaccinations are implemented, what can YOU do?**

You can just say **"No!"**

Would it make you a criminal offender -- and possibly land you in jail -- if you refused the vaccine?

If large numbers of people refuse the vaccination, the government would NOT have the resources to enforce a mandatory vaccination -- nor have the capacity to imprison hundreds of thousands (or millions) of people.

That's why it's necessary to urge as many people as possible to refuse the swine flu vaccine.

Should you refuse the vaccine, you definitely **WON'T** be alone. According to research reported in the August 25 issue of the *British Medical Journal*...

... **more than 50% of doctors and nurses in public hospitals would refuse the swine flu vaccine** because they're concerned about its side effects, and have doubts about its efficacy.

And according to a Fox News poll conducted in August, **the MAJORITY of Americans now believe that the swine flu vaccine may be DEADLIER than the swine flu virus itself.**

## **Without a vaccine, what can YOU do to protect yourself from the swine flu virus?**

There's a natural, scientifically proven method for **creating an environment in the body which is uninhabitable by the swine flu virus**, as well as other disease micro-organisms, germs and bacteria. It involves a natural oxygenating substance that makes your body immune to swine flu and virtually all diseases.

I urge you to watch the **7-minute video** titled "[\*The Swine Flu Virus Cure They Don't Want You to Know About\*](http://tinyurl.com/lrswb8)" at <http://tinyurl.com/lrswb8>.

This is the video the pharmaceutical industry does NOT want you to watch. Why? Because it threatens the billions of dollars they could potentially make from the swine flu vaccine.

Don't forget to **forward this article to everyone you know** because no one can escape exposure to the swine flu virus this flu season. It's that important. You might even end up saving someone's life.
