

The College of International Holistic Studies

The College of International Holistic Studies is built on a firm foundation designed to synergistically blend the rigor of medical science with the time-tested power of alternative and integrated therapies. Our teachers are selected for their expertise and ability to blend both science and the art of healing. Each program is designed to provide you with the practical knowledge and experience to heal using real-world tools, as well as the consciousness to appreciate the metaphysical tools that our souls provide.

Diploma in Herbal Medicine

DIPLOMA CODE: DHM100

This program is unique in that it delivers 3 different types of herbal structures, young buds, mature plants and “blood” of plants. Students will learn how to use and apply all 3 variations.

Medical Herbalism is a foundational textbook on the scientific principles of therapeutic herbalism and their application in medicine. Based on the author’s more than twenty-five years of herbal practice, it contains comprehensive information concerning the identification and use of medicinal plants both by chemical structure and physiological effect, the art and science of making herbal medicine, and the challenge to current research paradigms posed by complex plant medicines.

Gemmotherapy is derived from the Latin “gemma,” (bud), and Greek “therapeia” (medical treatment). Gemmotherapy is a modern medical intervention focusing on the cause of disease. Its remedies are a type of extremely potent herbal products manufactured principally from embryonic tissue of various trees and shrubs; but also from seeds, catkins, rootlets and sap.

Aromatherapy is the study and use of powerful anti-viral, anti-fungal, anti-bacterial essential oils for other related therapies to enhance wellness and promote deep relaxation. This program integrates advanced therapeutic methods for a more comprehensive healing effect. They are considered the “life-blood” of the plant world.

After attaining the Diploma in Herbal Medicine, the successful graduate can apply to the Canadian Examining Board of Healthcare Practitioners (cebhpc.com) for the designation CCHP Certified Clinical Herbal Practitioner.

COURSES:

YEAR ONE (12 consecutive months)

| | |
|---------|---------------------------------|
| MED 101 | Medical Terminology |
| APP 102 | CIHS Custom Intro to Human Body |
| BCM 101 | Essential Biochemistry |

YEAR TWO (12 consecutive months)

| | |
|---------|-----------------------------|
| HRB 201 | Medical Herbalism |
| CGO 100 | Gemmotherapy & Oligotherapy |
| ARO 101 | Aromatherapy Blending |
| BIZ 101 | Business Ethics (included) |

EVALUATION:

- Completion of required reading assignments, online tests and essays
- Satisfactory completion of 15 case studies and 2500 word dissertation on one successful case study
- A passing grade of 70% or higher on all tests and final exam

PREREQUISITES:

- High School Diploma or Adult Student status
- Fluent in the English language

DURATION: 925 Clock Hours / 24 consecutive months

Diploma in Herbal Medicine

COURSE DESCRIPTION:

DHM100 YEAR ONE (12 months):

MED 101: Quick Medical Terminology is a self-paced learning approach designed to ease you into the language of medicine that separates the layperson from the professional. The programmed-learning format requires active participation through reading, writing, answering questions, labeling, repetition, and providing immediate feedback. This format will help you to correctly decipher new terms by identifying and then practicing different word parts.

APP 102: CIHS Custom Introduction to the Human Body This shortened course enables allied health professionals to efficiently and effectively master the essentials of anatomy and physiology as well as understand the balance between homeostasis and disruptions to homeostasis. Rich in clinical resources that highlight disruptions to homeostasis, the book also includes a special section in each chapter that focuses on Wellness. These unique discussions help health professionals make the connections between knowledge of form and function with optimal healthy choices.

Note: CIHS is pleased to offer this text as well as access to the Wiley Plus Online Classroom at a special reduced student rate. This special pricing for the text and access to Wiley Plus is only available for purchase through the College

BCM 101: Pratt's Essential BioChemistry provides students with a succinct guide to modern biochemistry that includes plenty of chemistry, biological context and problem-solving opportunities. The text presents basic concepts of molecular structure and function, metabolism and molecular biology along with some insights into the biochemistry of health and disease. Teamed with the WileyPlus online environment, the Guided Tours cover the major topics of this course. These multi-part tutorials explain biochemistry in time and space. Interactive questions at the end of each tour reinforce learning.

Note: CIHS is pleased to offer this text as well as access to the Wiley Plus Online Classroom at a special reduced student rate. This special pricing for the text and access to Wiley Plus is only available for purchase through the College

COURSE description cont'd:

DHM200 YEAR TWO (12 months):

HRB 201: The author details the intricate chemistry behind herbalism, providing for the first time important background and insights into how herbal remedies are able to achieve their results and the limitations and potential of viewing herbs chemically. He then presents in-depth discussions of specific ailments and treatments organized by each of the major body systems, as well as delving into the special needs of children and the elderly. He includes the most up-to-date information on preparations, dosage, and contraindications; information on toxicology and the issues involved in determining dosage and formulation types for an individual; and the pros and cons of both commercial and traditional techniques. His materia medica presents 150 of the most beneficial herbs used in treatment practices, identifying not only their present uses but also their historical derivations.

CGO 100: This course, about gemmotherapy and oligotherapy, consists of a series of eight (8) modules. Each module completes with a test; module eight has two tests. The course concludes with a final exam.

ARO 101: The course contains the History of Essential Oils, Olfactory Process, the Limbic System, Absorption through the skin, The Lymphatic System, Methods of Extraction, Essential Oil Production and Adulteration, Effective Application, Safety Guidelines and Contra-Indications, Glossary of Therapeutic Action, Carrier/Base Oils, Varied Applications, Classification of Plants, Therapeutic Grade Essential Oils, Chemistry of essential oils, Chemical constituents of some commonly used essential oils, Essential Oil Monographs, Anise to Ylang Ylang, common conditions aided by Aromatherapy, Compresses, Poultices, Pregnancy, Children/Babies, Fragrant Way to Beauty, The Aromatherapy Massage, and finishes with the Aromatherapy Consultation.

BIZ 101: All professionals need to have an informed consent form outlining their capabilities to their clientele. The graduate needs an understanding of their scope of practice and a code of ethics that govern their practice. This course teaches the legalities around these requirements. Each student will be required to submit all 3 forms so that they understand their legal rights and obligations.
